

DISCOVER REACH TODAY

The Workspace Solution Designed Especially For You

Say Hello to Reach

An industry-specific workspace solution with customisable features to cater for your individual business needs.

REACH puts the power back in your hands. With user-friendly administrator tools, it helps to reduce resources spent on IT Management and offers the ability to work anywhere, at any time, on any device securely; eliminating constraints to an office and creating a mobile workforce.

What Does It Do?

Connected Systems

Integrating with your business applications via a single pane of glass.

Enhanced Security

Helping prevent sensitive data from leaving your business and safeguarding your business from external threats.

Self Service Administration

Putting the power in your hands with user friendly admin tools and reducing resources spent on IT Management.

Works Anywhere

The ability to work anywhere, at any time, on any device. Eliminating constraints to an office and creating a mobile workforce.

Personalised Workspace

Providing a greater user experience on a simple and secure mobile workspace.

Our Tailored Packages

Silver Package
\$39.00
 PER USER
 PER MONTH

Gold Package
\$69.00
 PER USER
 PER MONTH

Platinum Package
\$99.00
 PER USER
 PER MONTH

Depending on the package you choose, your business will benefit from the following components:

Key Features	Benefits
Microsoft Office Applications (Word, Excel, PowerPoint, OneNote, Outlook)	Work anywhere, any time on any device
SharePoint Online	Secure online document management to store all your company data
Cloud-Based Email Solution	An email system with unlimited storage and automatic archiving to retain important communications
Personalised Company Branding	Make REACH yours with a customised, easy-to-use single pane of glass
User Management (self-service)	Create new users, reset passwords and disable access in seconds - the power is in your hands
Device Management (self-service)	Be in control of any device that has access to your systems, including enforcing security and remotely removing data
Single-Sign-On and Integration with most 3rd party SaaS Applications	Access everything you need, including third-party applications with one set of credentials
Information Protection & Data Loss Prevention	Limit the information that leaves your business, e.g. your intellectual property and financial information
Compliance Tools	Meet your industry compliance requirements by safely storing your data in an environment tailored to your industry
Data Backups	Know your business data is safe and mitigate data loss by backing-up your Office 365 data to our secure data centre
Antivirus & Malware Protection	Minimise the risk of your data being compromised with antivirus and malware tools
